

FAST-MAN System

FAST-MAN means **QUICK FORMAT CHANGE** in manual mode.

It allows cuts positioning, accelerating setting process of the rewinder machine. Ideal solution for high speed production rewinders, easy to be assembled on new machine and good solution to modify or improve old existing machines.

It can be integrated with a system to visualize from a panel the cutting quotes

FAST-MAN is the best solution to reduce downtimes drastically, in manual mode.

save your time

save your production

save your money

work safely

What's FAST-MAN?

- It's **QUICK** cutting format measures change; blades and bottom knives move together.
- It's **QUICK** blades and b/knives' replacement, they're independent.
- It's **FAST**, the operator must only position blades and bottom knives to desired measure, no other settings are required.
- It's **TIME SAVING**, only 2-3 minutes are required to position 20 cutting units.
- It's **HIGH PERFORMING**, thanks to independent motors You can reach high speed and minimum cutting width down to 50 mm.
- It's **FLEXIBLE**, this system can be integrated with an automatic format change system
